**SECOND QUARTER REPORT**

**For the Six Month Period Ended**

**July 31, 2023 and 2022**

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

**Overview**

This Management's Discussion and Analysis ("MD&A") provides relevant information on the operations and financial condition of Happy Creek Minerals Ltd., ("Happy Creek" or the "Company") for the six months July 31, 2023 and 2022. This MD&A has been prepared by management as of September 26, 2023 and includes information up to that date.

The MD&A supplements, but does not form part of, the interim financial statements of the Company for the six months ended July 31, 2023 and 2022. The following MD&A should be read in conjunction with the interim financial statements for the six months ended July 31, 2023 and 2022 and the Company's audited financial statements for the years ended January 31, 2023 and 2022. The financial statements and the notes therein have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). All monetary amounts in this MD&A and in the financial statements are expressed in Canadian dollars unless otherwise stated. Additional information may be found on SEDAR at [www.sedarplus.ca](http://www.sedarplus.ca), and [www.happycreekminerals.com](http://www.happycreekminerals.com).

The MD&A may contain "forward-looking information" within the meaning of applicable securities laws, including statements that address capital costs, recovery, grade, and timing of work or plans at the Company's mineral projects. Forward-looking information may be, but not always, identified by the use of words such as "seek", "anticipate", "plan", "planned", "continue", "expect", "thought to", "project", "predict", "potential", "targeting", "intends", "believe", "opportunity", "further" and others, or which describes a goal or action, event or result such as "may", "should", "could", "would", "might" or "will" be undertaken, occur or achieved. Statements also include those that address future mineral production, reserve potential, potential size or scale of a mineralized zone, potential expansion of mineralization, potential type(s) of mining, potential grades as well as to Happy creek's ability to fund ongoing expenditure, or assumptions about future metal or mineral prices, currency exchange rates, metallurgical recoveries and grades, favourable operating conditions, access, political stability, obtaining or renewal of existing or required mineral titles, licenses and permits, labour stability, market conditions, availability of equipment, accuracy of any mineral resources, anticipated costs and expenditures. Assumptions may be based on factors and events that are not within the control of Happy Creek and there is no assurance they will prove to be correct. Such forward-looking information involves known and unknown risks, which may cause the actual results to materially differ, and/or any future results expressed or implied by such forward-looking information. Additional information on risks and uncertainties can be found within Financial Statements, Prospectus and other materials found on the Company's SEDAR profile at [www.sedarplus.ca](http://www.sedarplus.ca) Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there can be no assurance that such information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. The Company withholds any obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, unless required by law.

---

Under NI43-101 (2001), the reader is cautioned that results or information from an adjacent property does not infer or indicate similar results or information will or does occur on the subject property. Historical information from the subject or adjacent property cannot not be relied upon as the Company's Qualified Person ("QP"), a term which was created and defined under NI-43-101 has not prepared nor verified the historical information.

**COVID-19**

In March 2020 the world health organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the outbreak and its effect on the Company's business or results of operations at this time. During 2022 and 2021, the Company was able to conduct exploration work with measures in place for compliance to strict government health policy.

**Overall Performance**

Happy Creek Minerals Ltd. (the "Company") is engaged in the business of acquisition and exploration of mineral properties in British Columbia, Canada. The Company's objective is to create value for shareholders by locating and defining new mineral deposit discoveries that are in proximity to mines and infrastructure, and partner or sell such deposits to a larger mining company for development and production. Under certain conditions the Company may carry a project to production. The Company has a 100% interest in 7 mineral properties totalling approximately 640 square kilometres of mineral tenure located in British Columbia, Canada. It also holds a 1% NSR on the Silver Dollar property in the Cambourne mining district of southeast B.C. Happy Creek has exploration discoveries at the Rateria-West Valley copper and Fox tungsten properties that are the current focus of the Company.

Fox property: The Fox property is located 75 Km northeast of 100 Mile House in south-central B.C. The property contains a tungsten mineral system that is overall 12 km by 5 km in dimensions, with high grades in a near-surface setting. The Company discovered the Ridley Creek, BN and BK zones and with approximately 12,500 metres of drilling has delineated 582,400 tonnes grading 0.826% WO<sub>3</sub>(Indicated) and 565,000 tonnes grading 1.231% WO<sub>3</sub>(Inferred). This amounts to 4.8m Kg (Indicated) and 6.958M Kg (Inferred) of WO<sub>3</sub> with prices currently around US\$32.50/Kg WO<sub>3</sub>. These resources are among the highest grade in the western world and open for expansion. In addition, drilling at the Nightcrawler and South Grid prospects have returned intercepts that are above cut-off grade and remain open. Drilling in 2019, 2020 and 2021 at the Nightcrawler zone has identified and partially defined three mineralized volumes with potential to add to the current resources and remain open. The Company has continued to conduct basic prospecting work in un-explored areas of the property and additional new areas with tungsten were located in 2020 and 2021. A large-scale mineral system, globally significant resource grade and proximity to infrastructure are thought to make the Fox a rare and exceptional tungsten find. Plans include increasing the resource base and performing a preliminary economic assessment and bulk sampling.

**For the six months ended July 31, 2023**

---

Highland Valley (Rateria and West Valley) property: Since 2004, the Company has assembled the current 258 square km Rateria and West Valley property. The properties adjoin and surround the southern side of the Highland Valley Copper mine property, Canada's largest copper producer having over 50 years of continuous production. The property also adjoins the north side of the past producing Craigmont copper mine property. Extensive glacial till coverage with few outcrops and historically smaller, irregular shaped and patchwork claims affected the efficiency of previous exploration. It is the first time in the long history of this productive copper district that the current mineral tenure package has been acquired 100% by one owner. With more recent and improved access through the property and more modern exploration technology and academic research available, the Company has discovered and partially outlined by drilling Zone 1 and 2 on the Rateria property, located 6.5 km southeast of the Highmont open pit. These newly defined zones contain similar copper grade in drill core typical of other Highland Valley deposits. In addition to the near-term resource potential in Zone 1 and Zone 2 and excellent metallurgical characteristics, the Company has performed various technical surveys, studies and test drilling to generate additional targets thought to have large-scale discovery potential in this world class mining district.

Silverboss property: With approximately 120 square kilometres of mineral tenure surrounding the past-producing Boss Mountain molybdenum mine, the Company has conducted systematic surface rock and soil sampling, geology, and geophysics. This work has identified several new potential bulk-tonnage copper, molybdenum, gold and silver targets that are untested by drilling. Highlights include 53.01 g/t gold, 343.0 g/t silver in grab samples and 9.29 g/t gold, 27.3 g/t silver over 1.17 metres at the Dogtooth zone and 9.25 g/t gold, 514.8 g/t silver over 0.25 metres and 2.52 percent copper, 6.21 g/t gold, 295 g/t silver and 6.76 g/t indium in grab samples at the Silverboss shaft. In addition to the potential for molybdenum deposits adjacent to the former molybdenum mine, the underlying geology and presence of copper and gold in rocks provide opportunity to discover typical Quesnel Trough style porphyry copper-gold deposits beneath glacial till covered areas. In 2021, at the northern end of the Silverboss property, exploration has expanded a zone of 104-407 ppm copper in soil to 4.5 square kilometers with portions containing 10-22 ppb palladium and is thought to represent a large new target for copper-PGE type deposits.

Silver Dollar property: This property was purchased by Explorex Resources Inc. (now Origen Resources Inc.) Happy Creek holds a 1% net smelter return royalty on the property which contains several zones with high-grade gold-silver with lead, zinc and copper in outcrop, historical mining and drilling.

Hawk property: The property is underlain by geology of the Quesnel Terrane, which hosts numerous copper, copper-gold deposits and mines in B.C. The Company has conducted systematic geochemistry, geology, geophysics, trenching with limited drilling. Property results include chip sampling at the Main zone with 0.88% copper and 1.07 g/t gold across 5.0 metres and boulders nearby contain up to 4.5% copper and 18.0 g/t gold. Historical drilling approximately 100 metres north of the Main zone returned 3.0 metres grading 0.79% copper, 1.73 g/t gold, 9.43g/t silver and 1.83 metres containing 0.93% copper, 3.1 g/t gold and 12.34 g/t silver. The Company's exploration work has

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

confirmed the property holds potential for bulk tonnage alkalic porphyry copper-gold-silver deposits and is ready for drill testing.

Hen & Art-DL property: Prospecting, rock and soil sampling, trenching and reconnaissance drilling has identified several new gold skarn prospects at the Hen property. Trenching returned 2.1 metres of 3.98 g/t gold and 2.0 metres of 4.20 g/t gold and up to 35.06 g/t gold in grab samples at the Hen and Dyke zones, respectively. The DL property contains sediment-hosted gold-silver prospects sharing geological similarities with the Spanish Mountain deposit (Spanish Mountain Gold Ltd. website 243mt @ 0.43 g/t Au M&I) and FG Gold deposit (Karus Gold) to the north. Up to 42 g/t gold over 1.0 metre in a quartz vein occur at the DL adit and to the southwest, drill hole GL10-3 returned 72.5 metres of 4.03 g/t silver including 20.0 metres of 8.5 g/t silver.

### **Property updates**

The following is an overview of the Company's properties with a summary of results from the most recent years and quarters. The Company is active in its exploration and prospecting business, which requires from time to time, the acquisition or disposition of mineral claims which depend on uncertain factors such as opportunity, cost, market conditions and financial resources available. For mineral claims that are relinquished there can be no assurance that such property does not contain economic resources. The Company is registered as a Free Miner in British Columbia that allows it to stake its own mineral claims. The Company may see an appropriate opportunity to increase its existing mineral properties by staking claims directly itself, or may acquire from arm's length individuals, mineral claims for cash-only payments of less than \$10,000. These transactions are conducted in the normal course of its business activity. Larger property acquisitions involving option payments, work commitments and share issuance are described below.

Please refer to the Company's website, news releases and filings on SEDAR for additional details, maps, photos and other information.

### **Fox Tungsten Property**

Since 2005 the Company has acquired in excess of 6,952 hectares in the Cariboo region. The Company has paid \$215,000 in cash and issued 5,800,000 shares to assemble this package of properties. Some claims are subject to net smelter royalties between 1.5-2.5%.

On October 15th, 2020 the Company announced completion of 1,119 metres in seven drill holes and a large step out hole to the east returned positive tungsten under UV light. On January 28, 2021, the Company announced results of drilling that includes 2.12% WO<sub>3</sub> over 1.2m at the Creek zone and the large step-out hole to the east returned 1.08% WO<sub>3</sub> over 3.4 metres. These results are above the resource cut-off grade and remain open. Rock samples collected from the western part of the property returned up to 1.36% WO<sub>3</sub> and confirms significant tungsten occurs in this (September showing) area. Together, exploration has identified potential for tungsten mineralization to occur for at least 2 km northeast of the Nightcrawler zone and in the un-explored western portion of the property.

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

On September 9, 2021 the Company announced that a drill had been mobilized to test targets in the Nightcrawler-Creek Zone and on November 8, 2021, the Company announced that it had completed 12 diamond drill holes totalling 2052.7 metres. Eleven of the twelve holes successfully intersected tungsten-bearing skarn (calc-silicate rock) at this target, which is located at low elevation and accessible by logging roads and short drill trails. The holes range from 107.8m to 260.91m in depth. In addition, the Company reported the discovery of several new areas of high-grade tungsten mineralization through prospecting and UV lamping. Twenty-five rock samples including 17 chips (0.2m to 3.0m in width), one grab and seven float samples were collected from areas north and south of the RC Zone, in the eastern Creek Zone, and along new logging roads in the vicinity of the September showing.

On January 10, 2022 the Company announced the assay results of its 2021 drill program. Of the twelve holes drilled, the best was hole F21-09 which intersected 6.7m grading 0.43% WO<sub>3</sub>, including 1.2m grading 1.83% WO<sub>3</sub> and hole F21-11, which intersected 1.2M grading 0.67% WO<sub>3</sub>. Four step out holes were also drilled in the Eastern Creek zone which demonstrated that the skarn-hosted tungsten mineralization extends in the up-dip direction in hole F21-02 (1.0M grading 0.74% WO<sub>3</sub>), in the down-dip direction in hole F21-03 (2.2M grading 0.37% WO<sub>3</sub>) and to the northwest in hole F21-04 ( 1.0M grading 0.49% WO<sub>3</sub>). This near-surface mineralized zone remains open in several directions, including up-dip to surface to the north. Subsequent wireframe modelling of results indicated portions of the Nightcrawler zone have grade and thickness that potentially meet project resource criteria and require further drilling.

Between January and July, 2022, the Company has continued to focus on community and First Nations engagement in conjunction with developing a plan for submitting a permit application to the BC government. This permit application includes construction of an access trail to the current resource deposits on Deception Mountain which will assist with advanced stage exploration and development work. The Company has completed a database of geology, silt, soil, rock, trench and drilling results.

Results of work done between June and October 2022 are as follows. Two days of prospecting and mapping on the Fox tungsten property focused on the nature, distribution and geochemistry of quartz veins occurring within the Deception stock, a peralkaline monzogranite that occurs in proximity with the high-grade tungsten skarn deposits for which the property has current resources. Twenty rock grab samples of quartz collected from outcrop, subcrop and boulders contain from trace to maximum values of 5.22 ppm silver, 0.008 ppm gold, 62 ppm bismuth, 1010 ppm molybdenum and 37.5 ppm tungsten. These initial geochemical results and observations in part confirm and add to geochronology work (Chudy, T., 20171) that suggests either a prolonged magmatic event or two different mineralization events occurred. Widespread and abundant intrusive hosted quartz veins are thought to reflect the property's molybdenum mineralization, while a younger aged or re-mobilization event occurred for the tungsten mineralization. In an unexplored area south of the BN and 708 tungsten zones a stream sediment sample returned a positive 53 ppm tungsten and large blocks of calc silicate-skarn were found nearby in contact with the intrusive.

---

**Highland Valley Property (Rateria and West Valley claims)**

Since 2004 the Company has acquired in excess of 8,862 hectares for the Rateria property and 12,086 hectares for the West Valley property. The Company has paid a combined \$290,000 in cash and issued 1,900,000 shares to acquire these properties. Some claims are subject to net smelter royalties between 0.5-2.5%.

On May 21 and June 8th, 2020, the Company announced the start and completion of Phase 1 field work at the Rateria and West Valley property, respectively. This work in part utilized an XRF and short wave infra-red spectral tool (TerraSpec Halo) to study hydrothermal white micas within existing drill core and several surface prospects. The goal is to correlate Happy Creek's zones and prospects with those data recently published and known to occur on the adjacent copper mine property with respect to copper deposit centres.

On July 13th, 2020, the Company announced results of a hyperspectral study performed on Zone 1,2 and a few other surface copper showings on the Rateria and West Valley property. The results suggest the porphyry copper style alteration is closely comparable with that found next door at the currently producing mine, and there is opportunity to discover similar deposits in or near Zone 1,2 at Rateria and the untested PIM target on the West Valley property. The board has approved up to 3,000 metres of drilling to test several drill targets on the property. A new undocumented copper showing was located and sampled on the West Valley property. The Rick prospect contains pyrite, malachite, chalcopyrite and samples containing up to 0.64% copper occur in an area approximately 50 metres by 100 metres.

On October 15, 2020 the Company announced that a drill is being mobilized to the property to test the Pim target for the first time and follow up on previous encouraging results in Zone 1 and Zone 2. On December 7, 2020, the Company announced that it has completed 1,450 metres of the planned program and that it has engaged CJ Greig and Associates to conduct detailed geological work on the property. On December 17, 2020 the Company announced that it completed 2,058.5 metres of drilling in four holes on the Pim, Zone 1 and 2 targets.

After the year ending January 31, 2021, and on February 10, 2021, the Company announced that it has initiated an airborne magnetic geophysical survey covering all of the Rateria property, and on March 22, 2021, the Company announced drill results from the Pim, Zone 1 and 2 targets. Results include 8.8 metres of 0.41% copper, 0.13 g/t gold from Zone 2. The first ever drilling at Pim on West Valley has shown favorable geology exists for the presence of porphyry copper and a phase 2 drill program is currently being planned and permitted. One drill hole each in Zone 1 and 2 were designed to undercut the known mineralized zones, however did not intercept similar grade-width as in previous holes. The drill holes do not affect the near-surface resource potential for these two zones. CJ Greig and Associates have conducted detailed evaluation of the drill holes and the property, and planning of further work is in progress and anticipated to begin in early June 2021.

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

On August 4, 2021, Happy Creek announced the completion of the first phase of the 2021 field program at Highland Valley, including the collection of soil, silt and rock samples, prospecting and geological studies. The highlight of the work is the partial definition of a new copper-in-soil anomaly in the Billy South area on the Rateria property, with values ranging from 100 to 1,120 parts per million copper. The anomaly has been defined by very wide-spaced sampling over an area of approximately 2,000 by 400 metres and is open in all directions. There has been no previous drilling in the Billy South area, which is located 800 metres northeast of the Company's Zone 2 copper-gold deposit and 6.5 kilometres southeast of Teck's operating Highmont copper-molybdenum pits. The area is covered by a thin veneer of glacial till with minimal outcrop, but previous bedrock sampling by Happy Creek in the area returned assays of 3.21 per cent, 2.75 per cent and 0.61 per cent Cu. The area is underlain by prospective phases of the Guichon Creek batholiths with IP chargeability, resistivity and magnetic low features suggestive of porphyry mineralization. Additional geochemical sampling, prospecting and geological studies were completed in the fall of 2021. Three new multi-kilometre copper-molybdenum targets were identified through soil sampling and prospecting. These new targets named Billy, Corridor and Northwest, and have received minimal past exploration or drilling. Prospecting within the new soil anomalies and elsewhere on the very large property has discovered several new areas of mineralization, including Billy Road where a grab sample of float returned 1.45% Cu and 0.167 g/t Au.

On February 4, 2022, the Company announced that it acquired a 100% interest in the 535 hectare Mystery property that adjoins the Rateria property to the northwest. The Company paid \$10,000 in cash and issued 300,000 shares to acquire this property. The Mystery property contains a favourable geological setting and historical drilling results of interest. On March 3, 2022, the Company announced final results from its 2021 exploration work. The Company reported that it has identified several new large-scale copper-molybdenum exploration targets based on surface geochemical surveys, prospecting, geology and rock sampling. In addition, the Company has completed a detailed compilation of its historical exploration data and created a formal database of geology, soil, silt, rock and drill data.

Results of work done between June and October 2022 for the various Highland Valley claims are as follows.

**TDM Prospect**

The TDM Minfile (BC Government 092ISE153) prospect is located on the eastern side of the Rateria property at the southeast end of a prominent airborne magnetic low structure that trends northwest towards Antler, Billy Lake, Mystery property and the Highmont mine. The Minfile report for work done in 1972 indicates a 500 metre X 250m copper in soil anomaly occurs with rocks containing fine disseminated native copper. No subsequent work in this area is known. In 2021, happy creek's property-wide stream silt sampling returned 809 ppm Cu approximately one km north of the TDM prospect. In June 2022, this strongly anomalous silt sample was located and within 50 metres away, talus blocks of granodiorite contain 1-2mm veinlets of chlorite, sericite, quartz and trace iron oxide, locally native copper, malachite, azurite and bornite copper minerals. A grab sample contained 1430

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

ppm copper (0.14% Cu). From here, a traverse south towards the TDM prospect located additional areas where copper oxide minerals occur in the fractures. Together with the historical TDM information, copper in bedrock can be found at surface for about 1.5 km along the western edge of a 500m-1km wide and multi-km long magnetic low structure. Additional mapping and sampling of this area is planned.

**Mystery Prospect**

The recently acquired Mystery Lake property adjoins the Rateria property to the northwest of the Company's Zone 2 deposit and is approximately 6 km southeast of the Highmont open pit mine. In early July, an initial reconnaissance was performed to determine access routes into the area and review the geology. The property is mostly underlain by Bethsaida, Skeena and Bethlehem phases of the Guichon Batholith. Based on airborne magnetic surveys, north-south and northwest trending, recessive -weathering fault zones occur in largely glacial till-covered areas. At the south side of Mystery Lake, the collar of drill hole 93CVS-11 was located and surveyed (see news release March 2, 2022). This drill hole contains feldspar phyric dikes, extensive fracturing, alteration and zones of porphyry style copper-moly mineralization from surface to the end of the hole at 250 metres and was only partially sampled. On the east side of Mystery Lake, 1960's era flooded trenches contain highly fractured, sericite iron-oxide altered Bethsaida/Skeena phase rocks with local malachite copper mineralization noted. Approximately 400 metres south of the old trenches, a recent logging road ditch has partially exposed for about 40 metres, similar rocks to the trenches. Approximately 1.2 km southwest of Mystery Lake, very fine-grained chalcopyrite was observed with chlorite, sericite alteration minerals in well fractured outcrop and subcrop. A grab sample returned 700 ppm copper, 5.6 ppm molybdenum, and a boulder further west returned 1320 ppm copper, 35 ppm molybdenum. Together, the favorable geological setting for porphyry copper mineralization on the Mystery property is currently thought to be approximately 400 m by 1400 m in dimension, open, and provides an excellent porphyry copper target that warrants further exploration and drilling.

The Company looks forward to reviewing and compiling this new information to prepare a plan for exploration during 2023.

Between July 27 and July 31, the Company performed geology, rock and soil sampling on the West Valley property (Abbott) and Rateria property (Mystery, Billy, Zone 2). In addition, an archaeology survey for a number of potential drill sites was also completed. Results are pending.

**Silverboss property**

As announced on August 4, 2021, the Company completed field studies and soil sampling at the Silverboss property, which surrounds the closed Boss Mountain molybdenum mine, owned by Glencore Canada. Fieldwork completed in 2021 includes rock sampling and geological evaluation of high-grade and bulk-tonnage gold-silver and copper targets.

On September 9, 2021, Happy Creek announced that due to a shortage of drill contractors, particularly with experience in heli-supported drilling, a previously announced plan to drill the Silverboss gold-silver

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

targets was postponed. The program was designed to test directly beneath previously undrilled, high-grade Au-Ag mineralization identified at the Silverboss Shaft vein, Dogtooth vein and Horse Trail vein targets. Several longer holes were also laid out to test nearby bulk-tonnage targets with coincident geophysical and geochemical anomalies and sheeted or stockwork quartz-sulphide vein zones. These high-grade veins remain available as viable targets for future drill testing.

Also, at Silverboss, as announced on August 4, 2021, 143 soil samples were collected to extend the 2.5 kilometre-long Gus copper anomaly in a southeasterly direction. Additional follow-up soil and rock sampling of the Gus copper target was completed in the Fall of 2021 to extend the copper anomaly in a northwesterly direction. Grab sample results of dump material for the Silverboss Shaft returned assays ranging from 0.216 to 9.28 g/t Au, 2.44 to 199 g/t Ag and .055 to 3.12% Cu. At the Dogtooth vein target 900 m to the south, three 2021 samples returned 1.86 to 2.96 g/t Au, 3.89 to 257 g/t Ag, and 78 ppm to 6.00% Cu, plus highly anomalous arsenic, bismuth, antimony and tellurium values from quartz-sulphide veins cutting diorite. These targets have never been tested and remain a priority for future drilling.

On February 15, 2022, the Company announced the final results from its 2021 exploration work on the Silverboss property. The Company reported that it has expanded the Gus copper target to 4.5 square kilometres and identified with local palladium values based on soil geochemical surveys and a review and sampling of historical drill holes. Based on these results and their correlation with a strong magnetic response visible in government airborne surveys, additional mineral claims were acquired by staking to cover the 18 kilometre extent of the magnetic anomaly. The Company has completed a detailed project database for silt, soil, and rock samples and geology.

Results of work done between June and October 2022 are as follows. Prospecting to the east and south of the Boss Mountain moly mine was focused on regional, highly magnetic rocks that are the continuation of Happy Creek's Gus copper, nickel PGE(platinum group elements) prospect located approximately ten km to the north of the mine (see news release dated February 15, 2022). Fourteen widely spaced rock samples returned from trace to maximum values of 1035 ppm copper, 660 ppm nickel (with 1000ppm chrome), 0.031 ppm gold, 0.012 ppm platinum and 0.026 ppm palladium. The rock samples are hornblende diorite to gabbro and pyroxenite in composition, similar to the Company's Gus prospect. The geochemical values, geology and association with the regional magnetics suggest potential for a large-scale magmatic copper, nickel, PGE style mineral system.

#### **Hen and Art-DL property**

During July until early September 2018, the Company began prospecting along newly constructed logging roads that revealed rock outcrops within areas that have never seen any form of exploration. On September 25, 2018 the Company announced that a new prospect (Crane) was located where the first angular boulder collected beside a new logging road returned 7.6 g/t gold, 2.08% lead, 4.02% zinc and 0.16% copper. Follow-up prospecting suggests this sample is not far from source as other samples nearby returned geochemically elevated values of gold, copper, lead, zinc, arsenic and antimony. An outcrop chip sample two metres west of the high-grade sample returned 2.5m of 0.88% copper, 67 ppb gold. Quartz veins up to 1.5m in thickness occur over a strike length of a km beyond the Crane

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

prospect and returned positive gold pathfinder elements with up to 299 ppm antimony. On the Ledge prospect, rock samples returned values up to 2.13 g/t gold in an angular boulder while nearby outcrop and sub-crop contain 15-550 ppb gold along with elevated arsenic- a gold pathfinder. On the Ledge prospect, the sampling and geology work completed as well as airborne geophysical data suggest a minimum one km long by 350 m wide zone of positive gold-arsenic values warrant detailed soil geochemical and induced polarization surveys followed by trenching and drilling.

In the summer of 2021, a small field program was completed at Hen and Art-DL. It included prospecting of new logging roads, and soil grids to expand and refine targets for copper, gold and silver. Results continue to demonstrate elevated geochemical values of pathfinder elements antimony, arsenic and zinc occurring in several large-scale areas. The Company has completed a detailed database for silt, soil, rock and geology.

Results for work done between June and October 2022 are as follows. A stream sediment sample collected from a creek on the Hen northwest claims returned 0.372 ppm (parts per million or g/t) gold. This sample is located approximately 500 metres north of a different creek with a previously collected stream sediment sample that contained 0.154 ppm gold. For reference, the Company's 372 stream sediment sample database has a statistical mean of 0.003 ppm gold, and both creeks are considered highly anomalous. Currently, the upstream source of gold from these two creeks is unknown. However, based on BC government maps, the source area is underlain by Nicola Group volcanoclastic rocks with positive potassium, potassium/thorium and magnetic signatures identified by regional airborne geophysical surveys that are approximately 5 km by 3 km in dimension. These geophysical signatures are commonly associated with numerous copper and gold-bearing deposits in British Columbia. The Hen northwest is thought to have excellent potential for the discovery of a new gold target in an area having no known previous work.

Between June 5 and July 31, 2023, the Company performed geology, rock and stream sediment sampling around the northwest side of Hen and northeast side of the DL property. Results are pending.

**Financial Results of Operations**

The following is a summary of selected financial data for the Company for the three most recently completed years, accompanied by a discussion of those factors affecting the comparability of the data, including, where applicable, discontinued operations, changes in accounting policies, significant acquisitions or disposals and major changes in the direction of the Company's business.

As at and for the year ended	Prepared in accordance with IFRS		
	Jan. 31, 2023	Jan. 31, 2022	Jan. 31, 2021
Interest revenue	\$ 3,099	\$ 2,844	\$ 1,414
Comprehensive loss	\$ 348,958	\$ 844,456	\$ 372,059
Basic net loss per share	\$ 0.00	\$ 0.01	\$ 0.01
Total assets	\$ 18,651,320	\$ 18,805,596	\$ 19,283,018
Basic weighted average number of shares outstanding	124,439,715	122,976,537	108,377,760

The Company has no dividend policy and has no intention of developing a dividend policy in the foreseeable future. The Company has paid no dividends and has no retained earnings from which it might pay dividends.

**Results of Operations**

*Six months ended July 31, 2023*

The Company is taking measures to conserve cash during this difficult time. Exploration costs have been reduced and the lease for the corporate office has not been renewed. The Company will run virtually for the foreseeable future in order to save more costs.

On May 26, 2023, the Company terminated Mr. Hughes as President and Chief Executive Officer of the Company. Mr. Michael Cathro, Director, has been appointed to serve as interim President and Chief Executive Officer. In addition, Mr. Hughes resigned as a Director of the Company effective June 3, 2023. The Company is in negotiations with Mr. Hughes to settle his severance, under the terms of his consulting agreement.

The Company incurred a net loss of \$242,127 for the six months ended July 31, 2023 compared with a loss of \$216,640 for the same period in 2022. The following general and administrative expenses accounted for the change in the annual loss;

- Management fees and salaries decreased by \$82,715 due the reduction of employees during the period.
- Office and administration decreased by \$20,044 due to the Company implementing cost cutting measures.
- Share-based payments increased by \$127,050 due to share purchase options being granted during the quarter.

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

- The Company recorded a gain on sale of assets of \$7,690.

### **Deferred Income Taxes**

Deferred taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are likely to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in profit or loss in the period that includes the substantive enactment date.

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realization, provided they are enacted or substantively enacted by the end of the reporting period. Deferred tax assets are recognized to the extent that it is probable that they will be able to be utilized against future taxable income.

Deferred tax assets and liabilities are offset only when the Company has a right and intention to offset current tax assets and liabilities from the same taxation authority and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same entity or different entities which intend to settle current tax assets and liabilities on a net basis or simultaneously in each future period in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

Changes in deferred tax assets or liabilities are recognized as a component of tax income or expense in profit or loss, except where they relate to items that are recognized in other comprehensive income or directly in equity, in which case the related deferred tax is also recognized in other comprehensive income or equity, respectively.

The Company has financed a portion of its exploration activities through the issue of flow-through shares. Canadian tax legislation permits a company to issue flow-through instruments whereby the deduction for tax purposes relating to qualified resource expenditures could be claimed by the investors rather than the company.

A flow-through instrument comprises transfer of income tax deductions and common shares. Proceeds from an issuance of a flow-through instrument are allocated to liability and equity components in proportion, according to their respective fair values at the date of issuance. Upon renunciation of the flow-through expenditures for Canadian income tax purposes, the related flow through liability recognized in previous periods in the statement of financial position will be reversed and the related deferred tax liability will be recognized. Any difference between the liability settled and the deferred tax liability recognized is accounted for as other income or expense in profit and loss.

### **Liquidity and Capital Resources**

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT’S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

The ability of the Company to continue to operate as a going concern is dependent upon its ability to obtain necessary financing to meet the Company’s obligations and liabilities as they become due. As of July 31, 2023, the Company had cash and cash equivalents of \$51,982 (January 31, 2023 - \$33,019). The Company’s working capital deficiency as of July 31, 2023 was \$81,772 (January 31, 2023 – deficiency of \$239,849). The Company commenced on a capital raise at the end of fiscal 2023 and raised \$400,000 before commissions, by issuing 8,000,000 units. In addition, Directors of the Company advanced \$50,000 as short term advances.

The Company is a mining exploration and development company with no producing resource properties, and consequently, does not generate operating income or cash flow of a significant nature at this time. To date the Company has relied primarily upon the sale of Common Shares to provide working capital for exploration activities and to fund the administration of the Company. Since the Company does not expect to generate any revenues in the near future, it will continue to rely primarily upon the sale of Common Shares to raise capital. There can be no assurance that financing will be available to the Company when required. The Company has no debt instruments. The Company has no externally imposed capital requirements.

**Off-Balance Sheet Arrangements**

The Company does not have any off-balance sheet arrangements.

**RELATED PARTY TRANSACTIONS AND BALANCES**

**Relationships**

Standard Metals Exploration Ltd. (“Standard”)

**Nature of the relationship**

Standard is a private company controlled by an officer and director of the Company. Standard provides geological exploration and management consulting services to the Company.

Key management

Key management are those personnel having the authority and responsibility for planning, directing and controlling the Company and include the President and Chief Executive Officer, Chief Financial Officer, Corporate Secretary and Directors.

### **Risk Factors**

Happy Creek's success depends upon a number of factors, many of which are beyond the Company's control. Typical risk factors and uncertainties include the ability to raise financing, mineral title matters, exploration permitting or weather delays, skilled labour shortage, operating cost inflation, metal price and currency rate fluctuations, and changing legislation, regulations or the administration thereof. There is uncertainty in judging future potential value of a mineral property or claims that are deemed unnecessary and allowed to lapse or returned to a vendor. Risk factors could materially affect the Company's future operations and could cause actual events to differ materially from those described in forward-looking statements relating to the Company.

On March 11, 2020, the World Health Organization declared the Coronavirus ("COVID-19") outbreak a pandemic creating unprecedented global health and economic crisis. COVID-19's impact on global markets has been significant through October 2021 and subsequent to the date of the financial statements. The situation continues to rapidly evolve. The duration and magnitude of COVID-19's effects on the economy and on the Company's financial and operational performance remains uncertain at this time. As of the date of these statements, there has not been any impact on the operations as a result of COVID-19. The Company has devised and put in place, field operation protocols in response to BC regulations. The Company will continue to closely monitor the potential impact of the COVID-19 on its business.

### **Financial Instruments**

The Company recognizes financial assets and liabilities on the statement of financial position when it becomes a party to the contractual provisions of the instrument.

#### **(i) Financial assets**

Cash and cash equivalents are classified as subsequently measured at amortized cost.

Amounts receivable, exclusive of GST, are non-interest bearing and are recognized at the face amount, except when fair value is materially different, and are subsequently measured at amortized cost. Amounts receivable recorded are net of lifetime expected credit losses. The Company applies the simplified approach to determining expected credit losses, which requires expected credit losses to be recognized upon initial recognition of the receivables.

Investments in marketable equity securities are classified, at the Company's election, as subsequently measured at fair value through other comprehensive income. Investment transactions are recognized on the trade date with transaction costs included in the underlying balance. Fair values are determined by reference to quoted market prices at the statement of financial position date.

**HAPPY CREEK MINERALS LTD.**  
**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION and ANALYSIS**  
**For the six months ended July 31, 2023**

---

Reclamation deposits are classified as subsequently measured at amortized cost.

**(ii) Financial liabilities**

Trade and other accounts payable are non-interest bearing if paid when due and are recognized at face amount, except when fair value is materially different. Trade payables and lease liability are subsequently measured at amortized cost.

**Significant judgements, estimates and assumptions**

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results could differ from these estimates.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

**(i) Going concern**

The assessment of the Company's ongoing viability as an operating entity and determination of the related disclosures requires significant judgment.

**(ii) Exploration and evaluation properties and impairment**

The Company is required to make significant judgments regarding the capitalization of the costs incurred in respect to its exploration and evaluation properties. The Company is also required to make significant judgments on the ongoing feasibility of mineral exploration, and whether there are indicators that the development of a specific area is unlikely and exploration and evaluation properties should be impaired. Management has assessed impairment indicators on the Company's exploration and evaluation properties and has concluded that no impairment indicators existed as of July 31, 2023.

**Share Capital**

Common shares, stock options, warrants and agent's warrants as at September 26, 2023 are as follows:

	<b>September 26, 2023</b>
<b>Common shares</b>	<b>132,641,955</b>
<b>Stock Options</b>	<b>12,850,000</b>
<b>Warrants</b>	<b>20,972,743</b>
<b>Agents warrants</b>	<b>1,744,393</b>

**Future Outlook**

Management and its consultants monitor the financial markets, governments and legislation that may pertain to commodities, resources and the Company's business on the land. It evaluates and adjusts budgets and work performed based on results, market conditions and financial resources available. Through the course of its business Happy Creek has established two projects with new discoveries thought to be important assets with intrinsic market value. Over the past year the Company has received arm's length corporate interest in these assets, however in current market conditions, monetization of these assets may be premature. The Company is seeking various ways to fund further exploration and development of its projects with the goal to increase their market value for shareholders.

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

**1. NATURE OF OPERATIONS**

Happy Creek Minerals Ltd. (“Happy Creek” or the “Company”) was incorporated under the laws of British Columbia on November 17, 2004 and is in the exploration stage of the development of its mineral property interests. The Company’s registered office is Suite 1200 – 750 West Pender Street, Vancouver, British Columbia, V6C 2T8.

The Company’s principal business activity is the exploration and development of mineral properties. At the date of these financial statements, the Company has not been able to identify a known body of commercial grade ore on any of its properties and the ability of the Company to recover the costs it has incurred to date on these properties is dependent upon the Company being able to identify a commercial ore body, to finance its exploration and development costs and to resolve any environmental, regulatory, or other constraints which may hinder the successful development of the property. The Company is in the development stage with no source of operating revenue and is dependent upon equity financing on terms that are acceptable to the Company, to maintain its current operations. The Company is listed on the TSX Venture Exchange (“TSX-V”) under the symbol “HPY.V”.

**2. GOING CONCERN**

These financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of material uncertainties (as described in Note 1) related to events or conditions that cast significant doubt upon the Company's ability to continue as a going concern.

The Company’s ability to continue to meet its obligations and carry out its planned exploration activities is uncertain and dependent upon the continued financial support of its shareholders and on securing additional financing. There is, however, no assurance that any such initiatives will be sufficient and, as a result, there is significant doubt regarding the going concern assumption and, accordingly, the ultimate appropriateness of the use of accounting principles applicable to a going concern. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations for the foreseeable future. These adjustments could be material.

**3. BASIS OF PRESENTATION**

These interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting and follow the same accounting policies and methods of application as the Company’s most recent annual financial statements. These interim financial do not include all of the information required for full annual financial statements and should be read in conjunction with the financial statements of the Company as at the year ended January 31, 2023, prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

These interim financial statements were authorized by the Company's Board of Directors on September 26, 2023.

**3.1. Basis of measurement**

These financial statements have been prepared using the measurement basis specified by IFRS for each type of asset, liability, revenue and expense. Certain items are stated at fair value.

**3.2. Significant judgments, estimates and assumptions**

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results could differ from these estimates.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

**(i) Going concern**

The assessment of the Company's ongoing viability as an operating entity and determination of the related disclosures requires significant judgment.

**(ii) Exploration and evaluation properties and impairment**

The Company is required to make significant judgments regarding the capitalization of the costs incurred in respect to its exploration and evaluation properties. The Company is also required to make significant judgments on the ongoing feasibility of mineral exploration, and whether there are indicators that the development of a specific area is unlikely and exploration and evaluation properties should be impaired. Management has assessed impairment indicators on the Company's exploration and evaluation properties and has concluded that no impairment indicators existed as of July 31, 2023.

**4. SIGNIFICANT ACCOUNTING POLICIES**

**4.1 Cash and Cash Equivalents**

Cash and cash equivalents include cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash within ninety days of purchase.

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

**4.2 Equipment**

Equipment is recorded at cost and carried net of accumulated depreciation and accumulated impairment losses. Costs of additions and improvements are capitalized. An item of equipment is derecognized upon disposal, or impaired when no future economic benefits are expected to arise from continued use of the asset. Any gain or loss on disposal of the asset, determined as the difference between the proceeds and the carrying amount of the asset is recognized in profit or loss.

	<b>Depreciation Rate</b>
Off-road vehicle	12%

The Company provides for depreciation using the straight-line method at rates designed to depreciate the cost of individual items over their estimated useful lives. Depreciation on operating assets is included in the statements of loss and comprehensive loss as a component of office and administration expenses. Depreciation on assets utilized in mineral exploration activities is capitalized as a cost of exploration and evaluation properties.

See Note 4.15

**4.3 Exploration and Evaluation Properties**

**(i) Pre-license costs**

Costs incurred before the Company has obtained the legal right to explore are expensed as incurred.

**(ii) Exploration and evaluation costs**

Once the legal right to explore has been acquired, exploration and evaluation expenditures are capitalized as incurred, unless future economic benefit is not expected to be realized. The Company capitalizes, on a property-by-property basis, the costs of acquiring, maintaining its interest in, and exploring and evaluating mineral properties until such time as the lease expires, it is abandoned, sold or considered impaired in value. Indirect administrative costs are expensed as incurred. Exploration and evaluation properties are not depreciated during the exploration and evaluation stage.

Recovery of capitalized costs is dependent on successful development of economic mining operations or the disposition of the related mineral property.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers, non-compliance with regulatory requirements or title may be affected by undetected defects.

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

**4.4 Decommissioning and Restoration**

The Company is subject to various governmental laws and regulations relating to the protection of the environment. The environmental regulations are continually changing and are generally becoming more restrictive.

Decommissioning and restoration obligations encompass legal, statutory, contractual or constructive obligations associated with the retirement of a long-lived tangible asset (for example, mine reclamation costs) that results from the acquisition, construction, development and/or normal operation of a long-lived asset. The retirement of a long-lived asset is reflected by an other-than-temporary removal from service, including sale of the asset, abandonment or disposal in some other manner.

The fair value of a liability for decommissioning and restoration is recorded in the period in which the obligation first arises. The Company records the estimated present value of future cash flows associated with site closure and reclamation as a long-term liability and increases the carrying value of the related assets for that amount. Over time, the liability is increased to reflect an interest element in the estimated future cash flows (accretion expense) considered in the initial measurement of fair value. The capitalized cost is depreciated on either the unit-of-production basis or the straight-line basis, as appropriate. The Company's estimates of its provision for decommissioning and restoration obligations could change as a result of changes in regulations, changes to the current market-based discount rate, the extent of environmental remediation required, and the means of reclamation or cost estimates. Changes in estimates are accounted for in the period in which these estimates are revised.

As at July 31, 2023, the Company has determined that it does not have any decommissioning and restoration obligations related to current or former operations in excess of the reclamation bonds held by the B.C. Ministry of Energy and Mines.

**4.5 Impairment of Non-Financial Assets**

For the purposes of assessing impairment, the recoverable amount of an asset, which is the higher of its fair value less costs to sell and its value in use, is estimated.

**4.6 Provisions**

Liabilities are recognized when the Company has a present obligation (legal or constructive) that has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation. A provision is a liability of uncertain timing or amount.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects the current market assessments of the time value of money and the risk specific to the obligation. The increase in the provision due to the passage of time is recognized as a financing expense.

**4.7 Income Taxes**

Tax expense recognized in profit or loss comprises the sum of deferred tax and current tax not recognized in other comprehensive income or directly in equity.

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

Current tax assets and liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting periods, that are unpaid at the reporting date. Current tax is payable on taxable profit which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred tax is not provided on the initial recognition of goodwill or on the initial recognition of an asset or liability unless the related transaction is a business combination or affects taxable profit or accounting profit. Deferred tax liabilities on temporary differences associated with shares in subsidiaries and joint ventures are not provided for if reversal of these temporary differences can be controlled by the Company and it is probable that reversal will not occur in the foreseeable future.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are likely to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in profit or loss in the period that includes the substantive enactment date. Deferred tax assets are recognized for all temporary differences, carry-forward of unused tax credits and unused tax losses to the extent that it is probable that future taxable profits will be available against which they can be utilized.

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realization, provided they are enacted or substantively enacted by the end of the reporting period. Deferred tax assets are recognized to the extent that it is probable that they will be able to be utilized against future taxable income.

Deferred tax assets and liabilities are offset only when the Company has a right and intention to offset current tax assets and liabilities from the same taxation authority and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same entity or different entities which intend to settle current tax assets and liabilities on a net basis or simultaneously in each future period in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

Changes in deferred tax assets or liabilities are recognized as a component of income or expense in profit or loss, except where they relate to items that are recognized in other comprehensive income or directly in equity, in which case the related deferred tax is also recognized in other comprehensive income or equity, respectively.

#### **4.8 Flow-through Shares**

Canadian tax legislation permits a company to issue flow-through shares whereby the deduction for tax purposes relating to qualified resource expenditures can be claimed by the investors rather than the company.

A flow-through common share comprises both the transfer of income tax deductions equal to the proceeds received on issue, and a common share with a deemed cost for tax purposes of nil. The issuer of these shares allocates the proceeds to their liability and equity components according to the respective fair values of each at the date of issuance, with the tax attribute considered a liability to the

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

extent that a premium to market is obtained for the shares. Upon satisfaction of the spending requirements associated with the flow-through share agreements, a proportionate amount of the related flow-through liability recognized in previous periods in the statement of financial position will be reversed and the related deferred tax liability will be recognized. Any difference between the liability settled and the deferred tax liability recognized is accounted for as other income or income tax expense.

#### **4.9 Share-based Payments**

Share-based payment arrangements in which the Company receives goods or services as consideration for its own equity instruments are accounted for as equity-settled transactions and, when determinable, are recorded at the value of the goods and services received. If the value of the goods and services received is not determinable, then the fair value of the share-based payment is used.

The Company uses a fair value based method (Black-Scholes Option Pricing Model) for all share options granted to directors, employees and certain non-employees. For directors and employees, the fair value of the share options is measured at the date of grant. For grants to non-employees where the fair value of the goods or services is not determinable, the fair value of the share options is measured on the date the services are received.

The fair value of share-based payments is charged either to profit or loss or exploration and evaluation properties, with the offsetting credit to share option reserve. For directors, employees and consultants, the share options are recognized over the vesting period based on the best available estimate of the number of share options expected to vest. If options vest immediately, the expense is recognized when the options are issued. Estimates are subsequently revised if there is any indication that the number of share options expected to vest differs from previous estimates. Any cumulative adjustment prior to vesting is recognized in the current period. No adjustment is made to any expense recognized in prior periods where vested. For non-employees, the share options are recognized over the related service period. When share options are exercised, the amounts previously recognized in share option reserve are transferred to share capital.

In the event share options are forfeited prior to vesting, the associated fair value recorded to date is reversed. The fair value of any vested share options that expire remain in share option reserve.

#### **4.10 Related Party Transactions**

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties. Related party transactions that are in the normal course of business and have commercial substance are measured at the exchange amount.

#### **4.11 Earnings (Loss) per Share**

Basic earnings (loss) per share is computed by dividing net income (loss) (the numerator) by the weighted average number of outstanding common shares for the period (denominator). In computing

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

diluted earnings per share, an adjustment is made for the dilutive effect of outstanding share options, warrants and other convertible instruments.

In the periods when the Company reports a net loss, the effect of potential issuances of shares under share options and other convertible instruments is anti-dilutive. Therefore, basic and diluted loss per share are the same. When diluted earnings per share is calculated, only those share options and other convertible instruments with exercise prices below the average trading price of the Company's common shares for the period will be dilutive.

During the periods ended July 31, 2023 and 2022, all the outstanding share options and warrants were anti-dilutive.

#### **4.12 Share Issuance Costs**

Share issuance costs, which include commissions, facilitation payments, professional fees and regulatory fees, are charged directly to share capital. Share issue costs incurred from the issuance of flow-through shares are charged directly to share capital and expense in proportion to the value of the Company's shares at time of issue and any flow-through share premium.

#### **4.13 Comprehensive Income (Loss)**

Total comprehensive income comprises all components of profit or loss and other comprehensive income. Other comprehensive income includes gains and losses on re-measuring marketable securities.

#### **4.14 Financial Instruments**

The Company recognizes financial assets and liabilities on the statement of financial position when it becomes a party to the contractual provisions of the instrument.

##### **(i) Financial assets**

Cash and cash equivalents are classified as subsequently measured at amortized cost.

Amounts receivable, exclusive of GST, are non-interest bearing and are recognized at the face amount, except when fair value is materially different, and are subsequently measured at amortized cost. Amounts receivable recorded are net of lifetime expected credit losses. The Company applies the simplified approach to determining expected credit losses, which requires expected credit losses to be recognized upon initial recognition of the receivables.

Investments in marketable equity securities are classified, at the Company's election, as subsequently measured at fair value through other comprehensive income. Investment transactions are recognized on the trade date with transaction costs included in the underlying balance. Fair values are determined by reference to quoted market prices at the statement of financial position date.

Reclamation deposits are classified as subsequently measured at amortized cost.

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

**(ii) Financial liabilities**

Trade and other accounts payable are non-interest bearing if paid when due and are recognized at face amount, except when fair value is materially different. Trade payables and lease liability are subsequently measured at amortized cost.

**5. EQUIPMENT**

	<b>Off-road vehicle</b>
<b>Cost</b>	
Balance, February 1, 2023	\$ 38,078
Balance, July 31, 2023	<u>38,078</u>
<b>Accumulated depreciation</b>	
Balance, February 1, 2023	35,178

Depreciation for the period	<u>589</u>
Balance, July 31, 2023	<u>38,078</u>
Net book value	<u>\$ -</u>
	<b>Off-road vehicle</b>
<b>Cost</b>	
Balance, February 1, 2022	\$ 38,078
Balance, January 31, 2023	<u>38,078</u>
<b>Accumulated depreciation</b>	
Balance, February 1, 2022	32,822
Depreciation for the year	<u>2,356</u>
Balance, January 31, 2023	<u>35,178</u>
Net book value	<u>\$ 2,900</u>

During the period the Company sold equipment for proceeds of \$10,000 and recorded a gain of \$7,690.

**6. RECLAMATION DEPOSITS**

As at July 31, 2023, the Company had reclamation deposits held in trust by the Province of British Columbia totalling \$125,000 (January 31, 2023 - \$100,000) with regards to its exploration of properties in British Columbia.

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

**7. EXPLORATION AND EVALUATION PROPERTIES**

The following table summarizes the capitalized costs associated with the Company's exploration and evaluation properties:

	Cariboo properties British Columbia	Highland Valley properties British Columbia	Total
<b>February 1, 2022</b>	\$ 9,593,744	\$ 8,733,214	\$ 18,326,958
<b>Acquisition Costs</b>			
Option and acquisition costs	6,989	25,000	31,989
<b>Exploration Costs</b>			
Assaying and petrographic	3,719	9,238	12,957
Communications	23	-	23
Field supplies	130	5,590	5,720
Geological and consulting	58,743	60,233	118,976
Mineral tenure costs	175	-	175
Field support and drilling	330	-	330
Travel and accommodation	3,398	7,729	11,127
<b>January 31, 2023</b>	9,667,251	8,841,004	18,508,255
<b>Acquisition Costs</b>			
Option and acquisition costs	3,077	-	3,077
<b>Exploration Costs</b>			
Geological and consulting	29,665	23,244	52,909
Field supplies	3,583	1,719	5,302
Mineral tenure costs	1,058	-	1,058
<b>July 31, 2023</b>	\$ 9,704,634	\$ 8,865,967	\$ 18,570,601

As at July 31, 2023, cumulative METC rebates offset against deferred exploration and evaluation property costs totalled \$1,284,147 (January 31, 2023 - \$1,284,147).

The Company is required by the Government of British Columbia to incur a minimum amount of expenditures to maintain concessions. The minimum expenditure amount is based on the number of tenures and the length of time that the right to each concession has been held. Expenditures in excess of the required annual minimum may be carried over to future years and, subject to certain conditions, to other mineral tenures located in B.C.

**7.1 Highland Valley Mineral Property**

The Highland Valley property is located northwest of Merritt and southwest of Logan Lake in south central B.C. In prior years, the Highland Valley Properties were presented as Rateria, West Valley, Abbott Lake Property and Tyner Lake Property. In 2018, Abbott Lake Property was grouped with West Valley and Tyner Lake Property was grouped with Rateria. Together Rateria and West Valley

*The accompanying notes are an integral part of these financial statements*

**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

surround the south east, south and southwest sides of Teck Resources' Highland Valley copper mine property.

*7.1.1 Rateria*

During the year ended January 31, 2019, the Company acquired by staking for its own account, additional mineral claim tenures. The Rateria property is comprised of 34 mineral tenures totaling approximately 10,906 hectares.

During the year ended January 31, 2023, the Company entered into a claim purchase agreement with Masco Capital Inc. to acquire 535 hectare Mystery Property for \$10,000 cash (paid) and 300,000 common shares (issued).

Net Smelter Returns ("NSR") royalties on the Rateria property are as follows:

Rateria claims – 7 claims are subject to a 2.5% NSR royalty, payable to a maximum of \$3,000,000. The Company has the exclusive right to purchase 1% of the NSR for \$2,000,000.

Masco Claims – 2 claims are subject to a 2% NSR royalty, with the Company having the exclusive right to purchase 1% NSR royalty at any time for \$1,000,000.

Sho claims – 1 claim is subject to a 2% NSR royalty, with the Company having the exclusive right to purchase the NSR royalty at any time for \$3,000,000.

Tyner claims – 18 mineral claims are subject to a 2% NSR royalty, with the Company having the exclusive right to purchase the NSR royalty for \$2,000,000.

*7.1.2 West Valley*

The West Valley property consists of 32 mineral tenures totaling approximately 14,957 hectares.

The NSR royalty on the West Valley property is as follows:

Abbott claims - 8 claims are subject to a 0.5% NSR royalty, with the Company having the exclusive right to purchase the NSR royalty for \$1,000,000.

**7.2 Cariboo Mineral Property**

The Company has a 100% interest in a group of mineral properties located northeast of 100 Mile House, in south central B.C. The Silverboss property surrounds the former past-producing Boss Mountain molybdenum mine property.

*7.2.1 Silver Boss, Hen-Art-DL, Fox and Black Riders Property*

The Silver Boss property consists of 38 mineral tenures totalling approximately 12,082 hectares. The Hen-Art-DL property consists of 19 mineral tenures totalling approximately 8,989 hectares and the Fox property consists of 36 mineral tenures totalling approximately 17,245 hectares. The Black Riders property consists of 6 mineral tenures totaling approximately 2,564 hectares and adjoins to the east and is considered part of the Fox property. See 7.2.4.

The Silver Boss, Hen-Art-DL, Fox and Black Riders property mineral tenures all adjoin and are contiguous and together total 40,880 hectares.

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

Three of the Silver Boss mineral claims (previously the Gus Property) are subject to a 1.5% NSR royalty which the Company can buy back for \$1,500,000.

*7.2.2 Hawk Property*

The Hawk property consists of 23 mineral tenures totaling approximately 1,337 hectares. See 7.2.4.

Three of the Hawk Property mineral claims (previously the Grey Property) are subject to a 2% NSR royalty of which the Company can buy back 1% for \$1,000,000.

*7.2.3 NSR Royalties*

In 2005, the Company acquired a property comprised of five groups of mineral claims – Silver Boss (38 claims), Fox (36 claims), Hen and Art-DL (19 claims) and Hawk (23 claims). These mineral claims are subject to a 2.5% NSR royalty of which the Company can buy back 1% for \$2,000,000. See 7.2.1 and 7.2.2.

**7.3 Revelstoke District Properties**

*7.3.1 Silver Dollar Property*

In 2013, the Company acquired a 100% interest in 17 claims known as the Silver Dollar Property, located in the Revelstoke Mining District, British Columbia.

On May 11, 2016, the Company entered into the Silver Dollar Property Option Agreement (the “Option Agreement”) with Raffles Financial Group Limited (“RFG”). Pursuant to the Option Agreement the Company granted to RFG the sole and exclusive right and option to acquire an undivided 100% interest in and to the Silver Dollar Property subject to a 1% NSR royalty. RFG exercised the option by paying \$20,000 in cash, issuing 42,405 common shares of RFG to the Company and incurring \$100,000 in exploration expenditures.

Pursuant to the Option Agreement:

- RFG granted a right of first refusal to the Company for any future financings that RFG carries out to finance the mining work to be carried out on the property; and
- If the Company stakes any claim that is located, in whole or in part, within two kilometers of the perimeter of the property it shall be offered to RFG at the staking cost.

See 7.4.

**7.4 Marketable Securities**

In January 2020, RFG (see 7.3.1) completed a transaction with an unrelated entity pursuant to which the Company received, in consideration for its shares of RFG, 442,000 common shares of Origen Resources Inc. (‘Origen’), a Canadian public company, and 34,069 newly-issued shares of RFG (sold in fiscal 2021). In May 2021, Origen completed a transaction with an unrelated entity pursuant to which the Company received, in consideration for its shares of Origen, 2,520 (post-consolidated) common shares of Forty Pillars Mining Corp. (‘Forty Pillars’), a Canadian public company, and 42,000 newly-issued shares of Origen (sold in fiscal 2023 for total proceeds of \$7,003).

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

At July 31, 2023, the Company owned nil shares of Origen (January 31, 2023 – Nil shares of Origen), and 2,520 shares of Forty Pillars (January 31, 2023 – 2,520 shares of Forty Pillars), the shares of which are traded on the CSE.

	July 31, 2023	January 31, 2023
Marketable securities – fair value	\$ 554	\$ 554
Marketable securities – cost	-	-

**8. TRADE AND OTHER ACCOUNTS PAYABLE**

	July 31, 2023	January 31, 2023
<b>Financial Liabilities</b>		
Trade payables	\$ 65,296	\$ 128,658
Payroll accruals	(65)	1,998
Accrued liabilities	81,787	148,036
	<u>\$ 147,018</u>	<u>\$ 278,692</u>

All amounts are short term. The carrying value of trade payables, payroll accruals and accrued liabilities is considered a reasonable approximation of fair value. Included in accrued liabilities are short term loans, totalling \$50,000, from related parties.

**9. FLOW THROUGH SHARE PREMIUM LIABILITY**

The Company periodically issues flow through shares, to fund Canadian exploration programs, with any resulting flow through premium recorded as a flow through share premium liability. The liability is subsequently reduced when the required exploration expenditures are made, and accordingly, a recovery of flow through premium is recorded as income. Based on Canadian tax law, the Company is required to spend the amounts raised on eligible exploration expenditures by the end of the year subsequent to the date the expenditures were renounced.

The following is a continuity schedule of the liability portion of the flow-through share issuances:

	Issued on November 19, 2020
<b>Balance February 1, 2022</b>	\$ 16,253
Reduction of flow-through share liability on incurring qualifying expenditures	(14,931)
<b>Balance January 31, 2023</b>	<u>\$ 1,322</u>
	Issued on November 19, 2020
<b>Balance February 1, 2023</b>	\$ 1,322
<b>Balance July 31, 2023</b>	<u>\$ 1,322</u>

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**

**For the six months ended July 31, 2023 and 2022**

---

**10. EQUITY**

**10.1 Authorized Share Capital**

Unlimited number of common shares with no par value.

**10.2 Shares Issued**

Shares issued and outstanding as at April 30, 2023 are 132,482,455 (January 31, 2023 – 124,482,455).

During the six months ended July 31, 2023, the following share transactions occurred:

- i. On February 28, 2023, the Company completed a non-brokered private placement, issuing 8,000,000 units at a price of \$0.05 per share for gross proceeds of \$400,000. Each unit consists of one common share and one-half of a share purchase warrant. Each whole warrant entitles the holder to purchase one common share of the Company at an exercise price of \$0.10 per share up to the close of business on February 28, 2025. Cash finders' fees of \$17,400 were paid, and 348,000 finders' warrants were issued as part of the financing. Each warrant entitles the holder to purchase a unit of the Company comprising of one common share and one-half of a secondary warrant at an exercise price of \$0.05 per unit up to the close of business on February 28, 2025. Each whole secondary warrant is exercisable into one additional common share of the Company at an exercise price of \$0.10 per share up to the close of business on February 28, 2025.
- ii. On April 25, 2023, the Company granted 3,850,000 stock options to certain directors, officers and employees exercisable at a price of \$0.05 per share until April 25, 2028. The options vest immediately.

During the year ended January 31, 2023, the following share transactions occurred:

- i. On March 24, 2022, the Company issued 300,000 common shares at a price of \$0.05 for gross proceeds of \$15,000 as a part of the claim purchase agreement with Masco Capital Inc. (Note 7.1.1)
- ii. On January 9, 2023, the Company granted 250,000 stock options each to Messrs. Finley Bakker and Kent Pearson, strategic advisors and consultants to the Company. The stock options are exercisable at a price of \$0.05 per share for 5 years.

**10.3 Warrants**

The following warrants were outstanding:

	<u>Warrants</u>	<u>Exercise Price</u>
February 1, 2022	18,369,136	\$ 0.12
January 31, 2023	18,369,136	0.12
Issued	4,000,000	0.10
Issued – finder's	348,000	0.05
Expired	-	-
July 31, 2023	<u>22,717,136</u>	<u>\$ 0.11</u>

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

Expiry date	Warrants	Exercise Price
November 19, 2023	16,972,743	\$ 0.12
November 19, 2023	1,384,393	0.12
October 20, 2024	12,000	0.06
February 28, 2025	348,000	0.05
February 28, 2025	4,000,000	0.10
	22,717,136	\$ 0.11

At July 31, 2023, the weighted-average remaining life of the outstanding warrants was 0.35 years (2023–0.80 years).

#### **10.4 Share-based Compensation**

The Company has adopted an incentive share option plan for the benefit of directors, officers and employees, which options, to acquire up to 10% of the issued share capital at the award date, may be granted to eligible optionees from time to time. Additional shares have also been issued to consultants of the Company, as part of their compensation arrangement. Share options granted have a term of between one and five years, vest immediately or over time and have an exercise price determined by the directors. The Company’s policy is that the exercise price may not be less than the closing quoted price of the Company’s common shares traded through the facilities of the exchange on which the Company’s common shares are listed.

Total share options granted during the six months ended July 31, 2023 were 3,850,000 (year ended January 31, 2023 – 500,000). Total share-based payments recognized for the fair value of share options granted, vested and approved by the shareholders during the six months ended July 31, 2023 was \$127,050 (year ended January 31, 2023 - \$16,665).

The fair value of the share options granted during the six months ended July 31, 2023 and January 31, 2023 was estimated on the date of grant using the Black-Scholes Pricing Model with the following weighted average assumptions:

	Six months Ended July 31, 2023	Year Ended January 31, 2023
Strike price	\$0.04	\$0.04
Risk free interest rate	3.29%	3.29%
Expected option life (years)	5.00 years	5.00 years
Expected stock price volatility	125.12%	125.12
Dividend payments during life of option	Nil	Nil
Expected forfeiture rate	Nil	Nil

Option pricing models require the input of highly speculative assumptions, including the expected future price volatility of a company’s shares. Expected volatility has been estimated based on historical volatility. Changes in these assumptions can materially affect the fair value estimate and, therefore, existing models do not necessarily provide a reliable single measure of the fair value of the Company’s share options.

The following stock options issued under the employee stock option plan were outstanding:

	<b>Options</b>	<b>Exercise price</b>
January 31, 2022 (Exercisable – 10,650,000)	10,650,000	\$ 0.14
Cancelled/Expired	(2,150,000)	0.24
Issued	500,000	0.05
January 31, 2023 (Exercisable – 9,000,000)	9,000,000	\$ 0.12
Cancelled/ expired	-	-
Issued	3,850,000	0.05
July 31, 2023 (Exercisable – 12,850,000)	12,850,000	\$ 0.10

At July 31, 2023, the weighted average remaining life of the outstanding options was 3.09 years (2023 – 2.88 years).

**10.5 Normal Course Issuer Bid**

On May 7, 2018, the Company received approval to conduct a normal course issuer bid (the “Bid”) through facilities of the TSX-V to purchase up to 4,615,948 of the 92,318,976 issued and outstanding common shares of the Company, representing 5% of the Company’s issued and outstanding common shares. The Company paid the market price at the time of acquisition for the common shares acquired under the Bid. The Bid took place beginning May 7, 2018 and terminated on May 7, 2019. At January 31, 2019 and May 7, 2019, the Company had repurchased 159,500 shares at a cost of \$24,696. These shares have not been cancelled and returned to treasury and are being held in a brokerage account.

At July 31, 2023, there was \$52,783 (2023 - \$90,983) payable to directors of the Company, \$53,208 (2023 - \$30,930) payable to Standard Metals Exploration Ltd.

These transactions were in the normal course of operations and measured at their exchange amounts, being the amounts agreed to by the parties to the transactions.

## 12. MANAGEMENT OF CAPITAL

The Company defines capital that it manages as its cash and cash equivalents and share capital. The Company's objective when managing capital is to maintain corporate and administrative functions necessary to support the Company's operations and corporate functions; to perform mineral exploration activities on the Company's exploration projects; and to seek out and acquire new projects of merit.

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

The Company manages its capital structure in a manner that provides sufficient funding for operational and capital expenditure activities. Funds are secured, when necessary, through debt funding or equity capital raised by means of private placements. There can be no assurances that the Company will be able to obtain debt or equity capital in the case of working capital deficits.

The Company does not pay dividends and has no bank credit facility. The Company is not subject to any externally imposed capital requirements.

There have not been any changes to the Company's capital management policy during the year.

## **13. RISK MANAGEMENT**

### **13.1 Financial Risk Management**

The Company may be exposed to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives. The main objectives of the Company's risk management processes are to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. The principal risks to which the Company is exposed are described below.

#### **a. Capital Risk**

The Company manages its capital to ensure that there are adequate capital resources for the Company to maintain title to and explore its mineral properties. The capital structure of the Company consists of cash and cash equivalents and share capital.

#### **b. Credit Risk**

Credit risk is the risk that a counter party will be unable to pay any amounts owed to the Company. Management's assessment of the Company's exposure to credit risk is low.

#### **c. Liquidity Risk**

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due. As at July 31, 2023, the Company's working capital deficiency of \$80,450 (excluding flow-through premium liability). The Company may seek additional financing through debt or equity offerings, but there can be no assurance that such financing will be available on terms acceptable to the Company or at all. Any equity offering will result in dilution to the ownership interests of the Company's shareholders and may result in dilution to the value of such interests. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at July 31, 2023, the Company had cash and cash equivalents of \$51,982 to settle trade and other accounts payable of \$147,018 and current lease liability of \$nil.

#### **d. Market Risk**

Market risk incorporates a range of risks. Movements in risk factors, such as market price risk and currency risk, affect the fair values of financial assets and liabilities. The Company is exposed to these risks as the ability of the Company to develop or market its properties and the future profitability of the Company is related to the market price of certain minerals such as copper, molybdenum, tungsten, gold and silver.

*The accompanying notes are an integral part of these financial statements*

**HAPPY CREEK MINERALS LTD.**  
**Notes to the Financial Statements**  
**For the six months ended July 31, 2023 and 2022**

---

**13.2 Fair Values**

The carrying values of cash and cash equivalents, amounts receivable (excluding GST), reclamation deposits, and trade and other accounts payable approximate fair values due to their short-term to maturity nature or the ability to readily convert to cash. Marketable securities are carried at fair value.

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. All financial instruments (excluding lease liability) are classified as Level 1 items. Lease liability is classified as a Level 3 item.

**Level 1** – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

**Level 2** – Quoted prices in markets that are not active, or inputs that are not observable, either directly or indirectly, for substantially the full term of the asset or liability.

**Level 3** – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

**14. COMMITMENTS**

**14.1 Termination of Service Agreements**

On October 1, 2021 the Company entered into a consulting agreement with Mr. Peter Hughes to act as President and CEO of the Company whereby the Company will pay a monthly fee of \$10,000 for an initial term of twelve months and the agreement will automatically and perpetually renew for consecutive period of twelve months. In the event that the Company terminates this agreement without cause, it must make a one-time payment equal to six months consulting fees. The consultant may terminate the agreement by providing 30 days prior written notice to the Company. On May 26, 2023, the Company terminated Mr. Hughes as President and Chief executive Officer of the Company. In addition, Mr. Hughes resigned as a Director of the Company effective June 3, 2023. The Company is in negotiations with Mr. Hughes to settle his severance.

Mr. Michael Cathro has been appointed to serve as interim President and Chief Executive Officer.

The Company has a professional services agreement with its CFO. In the event that the Company terminates this agreement, it must make a final payment of \$5,000 to the CFO. On February 1, 2022, the Company amended the existing agreement such that the Company will now pay a base salary of \$3,000 per month for a term of three years until January 31, 2025. In the event that the Company terminates this agreement, it must make a payment equal to the six months base salary at that time.
